

SAFETY

From the beginning, Egenolf Industrial Group has maintained its focus on the health and safety of our employees and actively controlling the risks that are a part of our business. Ensuring that this goal is achieved, and that our customers experience the quality and efficient service they expect, is one of our primary goals.

To this end, we have established a comprehensive set of policies and procedures for our employees to follow. These serve as a guide and reference to make sure every project is performed in a safe and risk-free environment. These efforts require a thorough awareness of all safety practices and exposures to risk, as well as the active cooperation of all personnel involved.

To compliment our safety-minded culture, we have established a comprehensive insurance and risk management program with the assistance of some of the leading insurance carriers in the industry. With over \$8 million in coverage, this program reflects Egenolf's commitment to employee safety, while also fully addressing the risks presented in performing whatever scale of project for our customers.

Those same principles of excellence and quality that formed the basis of our company certainly hold true today. We will commit whatever resources necessary to ensure all of our projects are performed with the health and safety for both our employees and customer assets as our first priority.

Creating a Safe Environment is our first priority at Egenolf Industrial Group. Our people are our most prized asset. We constantly are seeking to be the best-trained and best-equipped company available to serve your industrial needs.

Our goal each and every day is:

- 0 Accidents
- 0 Incidents
- 0 Lost Time
